

July 2012

**Russell Neely – Chief Operating Officer Edlow International Company**

1983 – 1988: After earning his master's degree in public administration from the University of Arizona, Mr. Neely worked as a budget examiner at the Office of Management and Budget (OMB) in the Executive Office of the President for five years and specialized in program and budget analysis, legislative review, and interagency coordination between OMB, the Departments of State and Defense, and the National Security Council.

1988 – 2007: Mr. Neely left OMB for more international experience and worked as a project manager and executive for Edlow Resources Limited of Bermuda developing and managing various international investment projects, primarily in Africa, in the mining and transportation (port and rail) sectors. Mr. Neely worked and traveled extensively in Africa, primarily in Mozambique, Malawi, South Africa, and Uganda

2007 – Present: Mr. Neely is the Chief Operating Officer of Edlow International Company. In addition to his executive duties, he is responsible for negotiating charter agreements for specialized vessels to transport radioactive material and coordinates all logistical and regulatory requirements for the vessels. Recent (since 2007) charter shipments include spent nuclear fuel from South America and Europe to the USA, and fresh fuel assemblies from the USA to Europe. Mr. Neely also specializes in bid preparation for government contracts, negotiations on transport agreements, strategic planning, and project management of special projects. Mr. Neely assists the Chairman and CEO of the Company, Mr. Jack Edlow, in his work with the World Nuclear Association, the Nuclear Energy Institute, and other international organizations. Mr. Neely assisted Mr. Edlow in his organizational work with the Korean sponsors of the Seoul 2012 Nuclear Industry Summit. Mr. Neely also participated in the Summit in Seoul from March 23 – 24, 2012.
